Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dickler et al. (US 6,037,319) in view of Coleman (US 3,861,529).

Dickler et al. disclose water-soluble packets containing liquid cleaning concentrates comprising "two sheets, sealed together at the edge regions... preferably, by heat sealing." (column 3, lines 27-30). The specific shape of the packet is not clear from the reference. However, Coleman teaches a thermoformed package with various base shapes including a circular or oval shaped base; see figures 3-7.

Regarding claim 2, the height of the body wall of Coleman seems to be less than that of the base wall. Even so, the examiner takes OFFICIAL NOTICE that it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate such ratios.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the teachings of Coleman in the invention to Dickler et al. to provide for a particular shaped packet.
